

Health & Safety Policy

The following is a statement of the Company's health and safety policy in accordance with Section 2 of the Health and Safety at Work etc. Act 1974.

Statement

Bryson Products Ltd policy is to ensure, so far as is reasonably practicable, the health, safety and welfare of all employees working for the company and other persons who may be affected by our undertakings.

Bryson Products Ltd acknowledges that the key to successful health and safety management requires an effective policy, organisation, and arrangements, which reflect the commitment of senior management. To maintain that commitment, we will continually measure, monitor, and revise, where necessary, an annual plan to ensure that health and safety standards are adequately maintained.

The Operations Manager will implement the company's health and safety policy and recommend any changes to meet new circumstances. Bryson Products Ltd recognises that successful health and safety management contributes to successful business performance and will allocate adequate finances and resources to meet these needs.

The management of Bryson Products Ltd looks upon promoting health and safety measures as a mutual objective for themselves and their employees. It is, therefore, the policy of management to do all that is reasonably practicable to prevent personal injury and damage to property. Also, the organisation aims to protect everyone, including visitors and members of the public, insofar as they come into contact with our activities, from any foreseeable hazard or danger.

All employees have duties under the Health and Safety at Work etc. Act 1974 and are informed of their personal responsibilities to take due care of the health and safety of themselves and to ensure that they do not endanger other persons by their acts or omissions. Employees are also informed that they must cooperate with the organisation in order that it can comply with the legal requirements placed upon it and in the implementation of this policy. Bryson Products Ltd will ensure continued consultation with the workforce to enable all viewpoints and recommendations to be discussed at regular intervals.

The organisation will ensure a systematic approach to identifying hazards, assessing the risks, determining suitable and sufficient control measures, and informing employees of the correct procedures needed to maintain a safe working environment. We will provide, so far as is reasonably practicable, safe places and systems of work, safe plant and machinery, safe handling of materials and substances, the provision of adequate safety equipment, and ensure that appropriate information, instruction, training, and supervision is given.

We regard all health and safety legislation as the minimum standard and expect management to achieve their targets without compromising health and safety.

For and on behalf of Bryson Products Ltd

Signed:

Mark Reiner

Chairman
