

Sustainable Procurement Policy

Bryson Products Ltd is a privately-owned manufacturer and supplier of fixings, safety and protection products to the Construction Industry dedicated to leaving a positive legacy in our communities and environment. In supporting the built environment, we select and use a large volume of suppliers and resources. The choices we make have a significant impact on people, organisations, and the wider environment.

We have developed a Sustainable Procurement Policy outlining how we and our supply chain will influence procurement choices of goods, works and services to increase value for money, reduce consumption of primary resources, mitigate impacts on the environment and improve the lives of those in the communities in which we work.

By operating in line with this policy, we will play our part in reducing risks, safeguarding natural resources, delivering value to our customers, improving resource efficiency, traceability, and transparency, leaving a positive legacy on biodiversity, and safeguarding natural capital.

Our approach to sustainable procurement is in line with the principles contained within BS 8903. This standard was created to add social value and adopt best procurement practices. These policies are communicated and monitored with our Procurement Team in monthly meetings and updated regularly in accordance with legislation and company objectives.

Aims and Objectives:

- Use fewer resources and minimise the carbon emissions associated with the goods, works and services we procure.
- Procure all timber and timber products from legal and sustainable sources and procure other construction materials with a preference for recognised responsible sourcing schemes.
- Specify and procure materials and products that strike a responsible balance between social, economic, and environmental factors and generate benefits to society and the economy.
- Supply resource-efficient products and give due consideration to end-of-life uses.
- Promote, specify, and source materials that can be reused, and consider future deconstruction and recovery of resources to embrace the circular economy and leave a sustainable legacy across the globe.
- Where possible, procure within the UK, providing opportunities for small and medium-sized enterprises (SMEs), collaborate with the voluntary sector and increase the use of social enterprises.
- Ensure that fair contract prices and terms from suppliers are applied and respected and that ethical, human rights and labour standards are met, in line with our Modern Slavery Policy and the United Nations Global Compact Principles.

- Source goods, works and services that embody our environmental policy, Health & Safety policy and support the delivery of our Sustainable Development Strategy.
- Enhance the health and well-being of the people and communities we work with by promoting and sourcing materials and products that improve environmental quality.

Our Sustainable Procurement Policy is one of the ways in which Bryson Products Ltd. demonstrates its commitment to being the leader in sustainable development.

For and on behalf of Bryson Products Ltd
